PRESS RELEASE

AVIATION CONCEPTS OPENS ASIA'S LARGEST BUSINESS JET FACILITY

Subic Bay, Philippines is the one-stop location for private jet services

Subic Bay, Philippines, May 2011 --- Aviation Concepts, Asia's premier private jet management, charter and maintenance company celebrates the grand opening of its newly renovated state-of-the-art business aviation facility in the Subic Bay Freeport Zone, Philippines.

With nearly 100,000 square feet of hangar, shop and office space, Aviation Concepts acquired the facility as a readily available long-term alternative for private jet owners currently based in (or awaiting slots in) airports in the Asia Pacific region that are overcrowded, grossly overpriced and operationally restrictive.

Expanding on the capabilities of our base in Guam, the company continues to offer a full-range of aviation-related services and turnkey solutions including management, charter and maintenance in addition to fixed-based operator (FBO) services to our clients and transient aircraft.

*"Situated in the center of Asia's business hubs and in close proximity to Hong Kong, Singapore and Japan, our Subic Bay facility is strategically positioned to enable us to exceed aircraft Owners' expectations for high-level service and support while providing reduced costs and a positive ownership experience."*Mark Thibault, COO of Aviation Concepts.
