

AVIATION CONCEPTS WELCOMES NEW GULFSTREAM G550

Shanghai, China, March 2012 – Aviation Concepts, Asia’s number one charter company, welcomes a new addition to its luxurious fleet of business jets, the 2011 Gulfstream 550.

The G550 is powered by two Rolls-Royce BR710 turbofan engines and is able to travel non-stop for 6,750 nautical miles with speeds up to Mach 0.885. The Gulfstream 550 is equipped with PlaneView® avionics suite, the most advanced flight deck technology in the aviation industry exclusive to Gulfstream business jets to ensure maximum efficiency and safety. The G550 also features industry’s most advanced business communications —Wireless LAN and SatCom—that ensure full connectivity even in the highest altitude.

“Aviation Concepts is proud to be the number one charter company in Asia by flight hours based on Avinode statistics in 2011-” Yohei Sakurai, VP Sales. Yohei adds, “This new G550, matches the power of the company’s vision to cater the needs of China’s emerging market with its superior capability to travel non-stop for 6,750 nautical miles and its improved aerodynamics leading to fuel efficiency thus increasing the company’s edge to cost-effectively cover for long-range charter trips non-stop.

The Gulfstream 550 will be available for charter on May 2012.
